

RECYCLING IS NOW EASIER! 2010

NICOSIA/LIMASSOL

YOU ASKED FOR IT, WE RESPONDED. AS OF THE 1st FEBRUARY 2010
WE COLLECT PMD & PAPER SIMULTANEOUSLY ONCE A WEEK!

AS OF FEBRUARY 1st 2010

New simpler collection method for PMD & PAPER because YOU asked for it!

PAPER

PMD

The collection for PMD (plastic, metals & drink cartons of Tetra Pak type) in the special transparent bag either from the pavement of your house or from the blue bin will continue once a week.

What is changing

The paper will be collected once a week, on the **same day** with the PMD. Collection will be done **SIMULTANEOUSLY** with the special trucks of Green Dot Cyprus. The only thing you have to remember is that **ONCE A WEEK** you have to place the recyclables outside of your house for collection.

In addition we provide you with an extra easy way to place your paper stream on your pavement. The special brown bag that you can now find in all supermarkets. Of course you can still place the paper stream in a cardboard or in a brown plastic box or tie it into reams with string as you did before.

For the GLASS stream the collection remains the same. Take all your glass for recycling to the "BELL SHAPED" green bins in your neighborhood.

Everything now is simple to ease your life!

THE IMPORTANCE OF RECYCLING

The benefits of recycling in our daily life are numerous.

Recycling is a cyclic activity that has the power to improve the quality of our lives.

It is the recovery procedure of used materials and their forwarding for production of new products. By participating in recycling we give power to the cycle of life.

The participation of all citizens benefits our country and all of us since it helps:

- to relieve the environment from large quantities of household waste since a large part of it is comprised of recyclable material.
- to conserve raw materials and energy since the energy needed for manufacturing products from raw materials is much more than that which is needed when produced from used materials.
- the economy of our country and the improvement of the quality of our life.
- to safeguarding of public health.
- to a more human environment for us and our children.
